

Public Symposium

“The European Union’s Eastern Partnership: Results, Prospects and Visions “

A symposium entitled, “**The European Union’s Eastern Partnership: Results, Prospects and Visions**”, will be held in Sapporo on November 30, 2011. The symposium is being organised by the Embassy of the Republic of Poland in Tokyo as an accompanying event to the Polish Presidency in the Council of the European Union in the second half of 2011. The event is a follow-up to the Eastern Partnership Summit that was held 29-30 September 2011 in Warsaw, Poland.

During the symposium we would like to present the Eastern Partnership concept to Japanese public and academic opinion leaders, officials, experts and media representatives. We would like to discuss the most important and current issues related to the Eastern Partnership initiative, such as the assessment of the implementation of the Eastern Partnership, challenges and prospects over the next years.

We would like to invite you to take part in this event, which will be an excellent opportunity to discuss the most relevant issues regarding the Eastern Partnership initiative.

The Eastern Partnership (EaP)

EaP is the first comprehensive initiative introduced into the system of the European Union’s external relations, addressed to Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine. The bases for the initiated cooperation are shared European values such as freedom, democracy, rule of law and respect for human rights. Thanks to the participation in the Partnership, the countries of Eastern Europe and South Caucasus have chance to integrate closely with the European Union both politically and economically, at the same time taking advantage of the common market and political support of the community. The EaP is part of European Neighbourhood Policy which was the first coherent initiative through which the European Union could pursue an active policy towards its neighbours, supporting their economic modernization and political reform. The initiative was officially launched at the first Eastern Partnership summit in Prague on May 7 2009, which adopted a Joint Declaration. It marked the successful establishment of the Partnership as an integral component of European Union foreign policy. The EaP is the culmination of Polish efforts to build the best possible relations with its eastern neighbours and contribute to their inclusion in the coordinated policy of the European Union.
